

Sreeragh S

Product Engineer

Kochi, India | hey@sreeragh.me | sreeragh.me

GitHub: github.com/sreeragh-s | LinkedIn: linkedin.com/in/s-sreeragh

Professional Summary

Product engineer working across product design, prototyping and implementation. Building Zilobase and open-source tools, with a focus on AI agents, developer tools and local-first applications.

Professional Experience

Zilobase

Product Development | Current

- Building a self-hostable workspace that brings pages, structured databases, kanban boards and AI workflows into a connected knowledge system.
- Combining product decisions, interface work and implementation to turn early ideas into usable software.

Micro.company

Product Engineer

Web3Forms

Dashboard Development | Contract

- Built the Web3Forms dashboard as part of a contract engagement.

web3forms.com

DataMyth

Product Consultant

- Refactored the Python backend and implemented AI capabilities.

Clikkin

Product Consultant | Mobile App Development

- Developed the Clikkin mobile app for connecting members of the startup ecosystem.

App Store · Google Play

Skills

Programming Languages: TypeScript, Python, Rust.

Frameworks and Runtimes: React, Tauri, Electron, Bun.

Developer Tools: Git, terminal interfaces, desktop applications.

AI and Data: AI agents, Model Context Protocol (MCP), tool integrations, hosted OAuth, embeddings, vector search and local-first knowledge systems.

Product Development: Product design, rapid prototyping, zero-to-one development and open-source product engineering.

Projects

Zilobase zilobase.com

An open-source home for pages, databases, boards and AI workflows—on your own server.

Toolkit SDK toolkit-sdk.dev

Tools, hosted OAuth and policy-aware actions in one TypeScript SDK.

mucode github.com/mucode-dev/mucode

An open-source TUI where Codex, Claude Code and other agents can work side by side.

mica github.com/sreeragh-s/mica

A local-first workspace for linked notes, files, Git flows and nearby AI chat.

codex-design github.com/sreeragh-s/codex-design

An open-source design experiment made with Codex CLI for an OpenAI hackathon.

FormDB formdb.io

Connect HTML and JavaScript forms to a shared backend for submissions, validation, email notifications, spam protection and workflow integrations.

TrackPrompt trackprompt.io

Track brand mentions in AI answers, inspect cited sources and compare visibility against competitors across AI search platforms.

notelab-vector github.com/sreeragh-s/notelab-vector

A file-based local vector database for Electron apps, with approximate-nearest-neighbor indexing and support for OpenAI-compatible embeddings, local transformers and Ollama.

claude-nod github.com/sreeragh-s/claude-nod

A developer tool for reviewing and responding to Claude Code permission prompts remotely.

bizmo.chat bizmo.chat

Custom chatbot creation and training for business support and sales automation.

bizmo.site www.bizmo.site

A website builder for creators, bloggers and entrepreneurs focused on high-converting websites. Discontinued.

bizmo.social bizmo.social

A social-media management product for publishing workflows, audience engagement and brand growth. Discontinued.

Awards and Community

- **Kerala Startup Mission:** Received grant support as a grantee.
- **OpenAI Codex Nightline:** Second place at the hackathon held inside Kochi Metro.
- **ScaleUp Conclave:** Spoke about what comes after vibe coding.
- **TinkerSpace Grama Sabha:** Led a hands-on workshop building an MCP server from scratch.
